

We are not replaceable, don't drink and drive!

Written by Kylie Rooth

It is extremely dangerous for you and many others. You may run into someone on the side of the road, who's just trying to have a good jog. When you drink too much it is too hard to drive because you can't see well or control your car. You could get into a car accident.

Imagine if your pa got in an accident with a drunk driver. You would be very angry and sad. You might even want to get back at the person who was drinking and driving.

Your pa won't come back because he isn't replaceable.

I'm not replaceable! If you kill me you will always regret it. You can not bring me back to life. You also can't buy me at a supermarket.

Therefore you should never ever drink and drive!
